

How to Apply

Applicants should fill out the Application Form at www.iciq.es, and send it with their CV to phdfellowships@iciq.es

Only applications received before September 13, 2009 will be considered. A decision will be announced by the end of September, 2009.

About ICIQ

The Institute of Chemical Research of Catalonia (ICIQ) is a dynamic and innovative research institution located in Tarragona, 100km south of Barcelona. The Institute has consolidated its position as one of the top level institutions for chemical research in Europe and offers state-of-the-art equipment and facilities. Our Institute follows a combined theoretical-experimental approach, with dynamic collaborations between research groups for multidisciplinary approaches to relevant scientific-industrial problems.

Requirements

Candidates should have (or expect to obtain) a degree in Chemistry, Chemical Engineering, Physics or a related discipline. The studentship provides a stipend comparable to an F.P.U. M.E.C. fellowship rate and covers the tuition fees for the enrollment in the graduate program of the University Rovira i Virgili.

ICIQ PhD Fellowships:

The Institute of Chemical Research of Catalonia (ICIQ) offers PhD Fellowships in the following projects:

"Hierarchical Zeolites as Efficient Supports for Metal Species and Enzymes"

Prof. Javier Pérez-Ramírez

"New Organic Material and Molecules for Efficient Molecular Photovoltaic Devices"

Prof. Emilio Palomares

"New Gold-catalyzed Reactions"

Prof. Antonio M. Echavarren

"Palladium and Gold-catalyzed Methods for the Synthesis of Open Fullerenes"

Prof. Antonio M. Echavarren

"Design, Preparation and Catalytic Studies of P-OP Ligands in Metal-mediated Asymmetric Transformations"

Prof. Anton Vidal

"Supramolecular Catalysts for Hydroformylation"

Prof. Piet W. N. M. van Leeuwen

"Supported Ligands and Catalysts for Asymmetric Catalysis Reactions"

Prof. Miquel A. Pericàs

"Supramolecular Approaches to Catalysis"

Prof. Pablo Ballester

"Selectivity in Chemical Processes on Heterogeneous Catalysis"

Prof. Núria López

"Catalysts for Artificial Photosynthesis"

Prof. Antoni Llobet

"Computational Modeling of Enantioselective Catalysis"

Prof. Feliu Maseras

"Computational Design of Small-molecule Catalysts"

Prof. Carles Bo

"Dynamic Multivalency for the Recognition of Protein Surfaces"

Prof. Javier de Mendoza
