Quantum supremacy using  
a programmable  
superconducting processor

**John Martinis**  
Google and UCSB

John Martinis holds the Worster Chair of Experimental Physics at the University of California, Santa Barbara and is an expert in superconducting quantum circuits. In 2014, he was hired by Google Quantum A.I. Lab to develop the most powerful quantum computer. In 2019, he and his team claimed quantum supremacy, one of the most important milestones of the second quantum revolution.
