

Jornadas jóvenes investigadores CAPA

Lugar: Seminario del Área de Física Nuclear

Lunes 6 de mayo

- 15:30 David Izquierdo Villalba
Can the black holes live outside of the galaxies?
- 16:00 Rafael Logroño
2D star formation rates in nearby galaxies
- 16:30 Daniele Spinoso
Early monsters: the history of the first Black Holes in the Universe
- 17:00 Héctor Mirallas
TREX-DM, a detector for low mass WIMPs

Martes 7 de mayo

- 16:00 Carlos Bouthelier
Data Driven Flavour Symmetry Model
- 16:30 Jorge Alda
Effective Theories for B-meson anomalies
- 17:00 Cristina Margalejo
Background studies for IAXO-D0, a detector prototype for the future International Axion Observatory (IA XO) experiment
