# OTHER INFORMATION

## SKILLS REQUIRED

English Good (B1, B2) And  
Spanish Fair (A2)

Completed years of study: 3

Waste & Water Management | Environmental  
Engineering | Electronics

## PERIOD

03-JUN-2024 - 07-DEC-2024

## WORK OFFERED

The intern will play an integral role within a working group focused on addressing issues related to electrical and electronic waste. The intern will be actively engaged in processing both local and national data related to stakeholders and the informal sector. Additionally, the intern will be involved in laboratory testing of plastic components and precious materials extracted from electronic waste. The primary objective will be to formulate proposals for the retrieval or reuse of separated components from electronic equipment, contributing to the overall goals of the project.
