Postdoctoral Position

A postdoctoral position is available to work in the “*Amino Acids & Peptides Group*” in the ICMA (University of Zaragoza–CSIC) in the framework of an international project financed by the National Cancer Institute (USA) and related to the design, synthesis and structural analysis of non-proteinogenic amino acids and peptides containing them. More information about the research carried out in the group can be found at the website:

<http://wzar.unizar.es/acad/fac/cie/quiorg/aminoac/index.htm>

The applicant should hold a PhD in Chemistry (Organic Chemistry) and have strong training in the synthesis and spectroscopic characterisation of organic compounds. Experience in the field of amino acids and/or peptides would be a plus. The candidate should be enthusiastic, creative and able to work independently. Good oral and written communication skills in English will be appreciated.

The position is available immediately for a period of 3 years (1 + 2 years, renewable after evaluation at the end of the first year). A salary ranging from 1400 to 2000 €/month, according to the CV and capabilities of the candidate, is offered.

Applications should be sent to Prof. Carlos Cativiela (cativiela@unizar.es) and include a CV, a cover letter (stating research experience and skills, scientific interests) and the names of two referees.
