

Dear Sir or Madam,

We would like to draw your attention to the Summer School of Molecular Medicine, which will be held in the Jena University Hospital from August 29 till September 29, 2011. The Summer School will provide an excellent opportunity for young scientists to get familiar with research topics of molecular medicine and modern laboratory techniques. In addition, social events will provide a setting to meet and to learn more about the cultural life in Jena and its environs.

The program is open to participants from all over the world who hold a Master's degree (or equivalent such as Diploma or MD) in biosciences, biochemistry, medicine or related fields. The candidates will complete a practical course consisting of modules from four different complexes (Molecular Biology, Signaling, Morphology, and Animal Models). The courses are accompanied by a lecture series.

We will not charge a fee for the course and the accommodation will also be free of charge.

In addition, the accepted candidates will be supported with regard to the travel costs. Highly motivated candidates who have successfully completed the course will have the possibility to apply for a PhD position in the participating research groups.

You will find detailed information about the Summer School on our homepage under the following address:

<http://www.summerschoolmolmed.uni-jena.de/cms/>

We would like to ask you to distribute this information at your university and to encourage young scientists to apply to the Summer School. The deadline is May 31st, 2011.

Enclosed you find a flyer and we kindly ask to post this notice on your campus.

Thank you very much!

Sincerely yours

Regine Heller  
Siegfried Krause
