

## PhD studentship in Plasmonics / Nanophotonics : Southampton, United Kingdom

Applications are invited for a 4-year PhD studentship in a joint UK-France research programme. The project will be based in the Department of Physics and Astronomy, University of Southampton, and will be supervised by Dr Otto Muskens. Regular 6-month exchange visits are planned to the University of Toulouse which will be covered from available travel funds.

Next to an excellent academic track record and good practical skills, the applicant should demonstrate enthusiasm and a motivation for doing experimental nanophotonics and plasmonics research. Enquiries should be sent to Dr Otto Muskens, [o.muskens@soton.ac.uk](mailto:o.muskens@soton.ac.uk). This studentship provides a tax-free maintenance grant (available to UK and EU citizens only) of £13,590 per annum, and includes all higher degree registration fees.
