

IQIS/NINT NANOSCALE QUANTUM OPTICS

Graduate and postdoctoral research positions available in nanophotonics, quantum optics, and optomechanics.

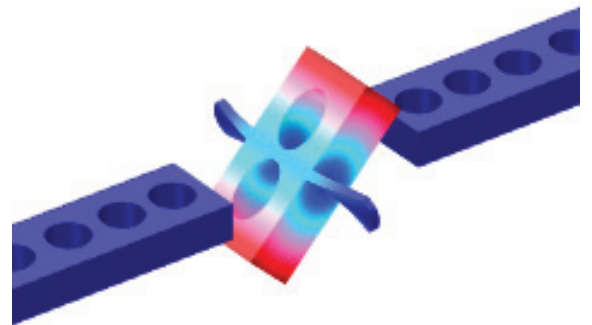

The Nanoscale Quantum Optics group at the **Institute for Quantum Information Science** (University of Calgary) and the **National Institute for Nanotechnology (NINT)** is recruiting new group members.

Available projects combine theory, simulation, nanofabrication, and optics experiments. IQIS and NINT provide rich opportunities for collaboration with top optics, nanotechnology, and condensed matter physics researchers.

The application deadline for graduate programs is March 1, 2013. Post-doctoral positions are available immediately.
