

El Programa Madrid-MIT M+Vision (mvision.madrid.org) anuncia la tercera convocatoria de becas de postgrado en "Translational Biomedical Imaging", abierta hasta el 15 de Febrero de 2013 (con fecha de incorporacion en Julio de 2013).

Aunque el programa esta abierto a investigacion, desarrollo e innovacion de todo tipo de modalidades de imagen biomedica, desde el Instituto de Optica (miembro fundador del Consorcio M+Vision, y lider, junto al Wellman Center of Photomedicine/Harvard-MGH-MIT, del Area de Imagen Optica) animamos a la presentacion de candidaturas en "Translational Optical Imaging". La investigacion se desarrollara en colaboracion entre centros de Madrid y de Boston.

INFORMACIÓN SOBRE EL PROGRAMA Y BASES PARA LA PARTICIPACIÓN EN EL MISMO

Update: Applications for the 2013 M+Visión Fellowship in Translational Biomedical Imaging will be **due February 15**. The Fellowship begins in July.

Don't delay! You can submit your application package once all the information is uploaded. You can check the status of your reference letters from the application Web site, and send reminders for letters, even after you submit your application.

About the M+Visión Fellowship

We are recruiting emerging biomedical technology innovation leaders from medicine, science, and engineering for a Fellowship that is:

+

Multidisciplinary: You will work with other Fellows and faculty from science, engineering, medicine, and business.

+

Flexible: The Fellowship offers stipend support, research funds, and lab choices throughout Madrid and Boston to enable maximum flexibility in project choice.

+

Focused on important problems: Your ideas and projects will evolve in response to major medical needs.

+

Designed by you: Fellows work individually and in groups to define and develop multidisciplinary projects, mentored by world leaders.
