

Tenure-Track position in Particle Phenomenology, U. of Amsterdam

The Institute for Theoretical Physics of the U. of Amsterdam is seeking exceptional candidates to fill a Tenure-Track position in Particle Phenomenology, commencing in September 2013.

The institute currently hosts many research groups active in String Theory, Astroparticle Physics and High Energy Physics, as well the recently founded GRAPPA (Gravitation and Astroparticle Physics in Amsterdam) Institute, which recently hired 6 new faculty. It is housed in the new building of the Faculty of Science at the Science Park Amsterdam, and the resulting proximity of experimentalists at Nikhef, working on ATLAS, Km3Net, CTA, LOFAR and XENON100/XENON1T, provides an ideal ground for further collaborations.

This tenure-track position is funded as part of the Delta-Institute for Theoretical Physics (D-ITP), a new initiative joining theoretical physicists from Amsterdam, Leiden and Utrecht. The primary aim of D-ITP is to deepen the collaborations between the associated researchers, and the candidate is expected to actively contribute to this. For this position, the institute is looking for candidates with experience in the general field of Particle Phenomenology.

Applicants will have a proven track record in research, a demonstrable commitment to teaching at the undergraduate and graduate levels, and, most importantly the ability to develop an independent and vigorous theory research program. The successful candidate is also expected to foster collaborations not only within the D-ITP, but also with local and national experimental groups.

Applicants should submit a detailed CV together with research and teaching statements (in pdf format) by email to [application-science@uva.nl](mailto:application-science@uva.nl) (specifying the vacancy number 12-319 in the subject line), and arrange for three recommendation letters to be sent to [references-science@uva.nl](mailto:references-science@uva.nl). The subject line should be "Reference, vacancy 12-319, [name of the applicant]". Further details can be obtained upon request. Review of applications will begin on March 1, 2013 and continue until the position is filled.
