

STUDENTSHIP PROGRAMME AT THE ISAAC NEWTON GROUP OF TELESCOPES

We welcome applications for four places on the ING studentship programme 2014/15.

The deadline for applications is

Tuesday 1st April 2014.

Details of the programme can be found on:

<http://www.ing.iac.es/astronomy/science/studentship.html>

The programme provides a unique opportunity for up to four PhD, MSc or undergraduate astronomy students to get hands-on experience of work at an international observatory. Successful applicants will spend one year on La Palma, supporting imaging and spectroscopy runs at the Isaac Newton Telescope (INT) 2.5m and working on projects supervised by the ING staff. The studentship programme is open to anyone, but we particularly welcome applicants from our three partner countries: the Netherlands, Spain and the UK.

We would be grateful if you would draw the attention of suitable candidates to this opportunity.

Marc Balcells
Director ING
