

**The Interdisciplinary Center for Intercultural and Indigenous Studies (ICIIS – FONDAP)
invites applications for one postdoctoral research position**

The ICIIS-Fondap Center is a new center for research in Chile for intercultural and indigenous studies that includes the analysis of genetic data as one research line. The center is a large collaboration of anthropologists, bio-anthropologists, sociologists, ecologists, psychologists, historians, statisticians, etc., whose members are located at 3 Universities in Chile.

The ICIIS-Fondap center together with the Faculty of Mathematics at the Pontificia Universidad Católica de Chile invites applications for a postdoctoral position to work on a collaborative project on admixture in genome-wide studies. We are seeking a highly qualified and motivated candidate with experience in probabilistic, statistical and data mining methods applied to genomic data.

The successful candidate must have a PhD at the time of the appointment (awarded within the last 5 years) and a demonstrated record of publications. Salary is approximately US\$ 30,000 per year. The appointment may begin as soon as July 2015, and will be for an initial period of one year, with renewal for up to two years, contingent upon satisfactory progress.

Interested researchers should send a CV (including publication list), reprints of selected publications, and a short statement of research interests (max of 3 pages) to Prof. Susana Eyheramendy (susana@mat.puc.cl) and iciis@uc.cl indicating in the subject: "postdoctoral application to genomic data". Applicants should also request for at least 2 letters of recommendation to be sent directly from the writers. Full consideration will be given to applications received by April 30th 2015.
