

This is to let you know that due to further commercial success and continuing growth, Oxford Lasers is urgently looking to recruit two Laser Application Engineers to work in the Laser Applications and R&D teams.

Detailed job descriptions are attached but in summary we are looking for one postgraduate and one graduate level engineer respectively to work on DPSS laser processing of advanced materials (microdrilling/cutting/milling, surface patterning, etc) using nanosecond, picosecond and femtosecond lasers. Both openings are immediate and the successful applicants will be based in Didcot, Oxfordshire, UK.

I would greatly appreciate if you could consider this enquiry further and distribute among your students or other potential applicants. Please contact directly myself and our CEO, Dr. Martyn Knowles at [martyn.knowles@oxfordlasers.com](mailto:martyn.knowles@oxfordlasers.com) or +44-1235-814 433.
