

# Thursday's NanoSpin-off

## TALKS

May 26<sup>th</sup>, 17h

PRESENTIAL  
(AulaRoom. I+D Building)

Cátedra **SAMCA**  
de Nanotecnología  
Universidad Zaragoza

**INMA**  
INSTITUTO DE NANOCIENCIA  
Y MATERIALES DE ARAGÓN

ONLINE  
Zoom

TALK

“Advanced Dispersed Particles, technology-based company for a new generation of mineral filters that protect in the broad spectrum with a single ingredient”

SPEAKER

**Blanca Motos**

Technical Manager en ADPARTICLES  
PhD in Organic, Mineral and Industrial Chemistry (ENS Chimie de Montpellier),  
Master in Sustainable Chemistry (Universidad de Zaragoza- York University),  
Degree in Chemistry (Universidad de Zaragoza).

PRESENTER

**Reyes Mallada Viana**

Catedrática de la Universidad de Zaragoza.  
Directora de la Cátedra SAMCA de Nanotecnología

ADParticles is a technology-based company established in 2011 as a spin-off of the Spanish National Research Council (CSIC). The main activity of the company is the development, manufacture and commercialization of mineral sunscreens and pigments for the cosmetic and pharmaceutical sectors, under the brand of ADPCosmetics. These product ranges are based on titanium oxide and zinc oxide or iron oxides and are on the market under the names of enhanceU and effectiveU
