

Dear scientific community,

We are pleased to announce the upcoming celebration of the 3rd Conference on Advanced Materials AMatS 2024 to be held in Valladolid on **November 12, 13 and 14** of this year!

This edition will not only attract participants from the 7 Regions collaborating in the "Materials with advanced functionalities for the new technological transformation" project<sup>1</sup> but extends its invitation to any materials science enthusiast in general, with interest in exploring the most recent advances and sharing their knowledge and experience. It will also provide an opportunity to hear from some of the most prominent and recognized scientists in the field.

The Conference Program will offer a unique framework for exchanging ideas and establishing new collaborations so we encourage you to submit an abstract, as the registration process is already opened. We will soon share more details about the scientific agenda, registration process, accommodations, as well as the social program. You can find all the information available so far at:

<https://amats2024.es/>

We are looking forward to seeing you there to make this event a real success!

Sincerely,

The organizing committee.
