SCHNEIDER ELECTRIC EUROPEAN

HACKATHON

NOVEMBER 19TH

An ultra-interactive digital competition in which you will be able to fight against climate change through technology by resolving one of the 2 main challenges: **Data Science or Cybersecurity.**

Connect & work alongside +300 professionals, leaders & mentors from the European tech industry while having fun programming, discussing new ideas, and developing software projects.

Choose your challenge

CYBERSECURITY

CHALLENGE

Ensure the supply of renewable energy & protect wind power stations from a cyber attack **by detecting, analyzing, and fixing vulnerabilities** to regain access to the system, and stop the attack in the shortest time possible.

DATA SCIENCE

CHALLENGE

Preserve the environment & protect our forests **by creating an image recognition system that early detects deforestation areas** to help governments and communities deploy action plans to stop this problem & revert the damages caused to these protected areas.

BOTH CHALLENGES WERE DESIGNED TO FIT STUDENT TO SENIOR PROFILES.

WIN
50000€
