TALK

VLC Photonics: pioneering services for the development of photonic integrated circuits

SPEAKER

Iñigo Artundo

VLC Photonics
CEO & Co-founder. Telecommunications engineer / Ph.D. in Applied Physics and Optics

PRESENTER

JOSE MARÍA DE TERESA

INMA (CSIC-Universidad de Zaragoza)

VLC Photonics is an engineering company providing services for the development of photonic integrated circuits (PICs). Since 2011 as a spin-off company of UPV, our team has been growing to support customers all over the world in the development of PICs for cutting-edge applications. Recently, the company was acquired by Hitachi High-tech and belongs to its larger international group.
