INSTITUTO DE NANOCIENCIA
Y MATERIALES DE ARAGÓN

TALK

Bridging the gap between Academy to Business (A2B)

SPEAKER

André Pereira

Nanoenergy, SPin-off of Porto University

PRESENTER

Prof. Clara Marquina

CSIC Research Professor. Instituto de Nanociencia y Materiales de Aragón (INMA) .
Department of Physics of Materials and Nano-systems. Magnetism of Nanostructures
and their Applications (MAGNA) group

In an Era where Science is itself under a new paradigm in which carrying out applied and economically viable research is a constant challenge and a milestone of the leading European research, the academy and industry should establish a strong connection between them, the so-called Academy to Business vector (A2B).

In this talk, I will try to address both academic and business perspectives, identifying the central barrier and opportunities. Finally, I will present an evolution case that originates from the academy research, leading to the formation of a spin-off @ Porto University (inanoEnergy) in the nanotechnology field, ending with the current situation and explaining the future steps.
